

Upload Image To IBM Container

Date	08 November 2022
Team ID	PNT2022TMID05761
Project Name	Smart Fashion Recommender Application

CREATING REPOSITORY IN IBM CLOUD:

Create repository

1. Tag an image to point to this registry. Choose a local image, target namespace, and target repository.

```
docker tag <local_image> icr.io/<my_namespace>/<my_repo>
```

2. Push the tagged image.

```
docker push icr.io/<my_namespace>/<my_repo>
```

UPLOAD IMAGE TO IBM CONTAINER REGISTRY:

The screenshot shows the IBM Cloud Container Registry interface. The left sidebar contains navigation links: Container Registry, Quick start, Namespaces (1), Repositories (1), Images (1), Trash (0), and Settings. The main content area is titled 'Repositories' and includes a 'Location' dropdown set to 'Global'. Below this is a search bar and a table of repositories. The table has columns for Name, Image count, Namespace, and Last updated. One repository, 'lbmproj', is listed with an image count of 1, namespace 'myproj', and updated 4 days ago. A 'Create' button is located in the top right of the table area. The bottom of the table shows pagination: 'Items per page: 25' and '1-1 of 1 item'.

Name	Image count	Namespace	Last updated
lbmproj icr.io/myproj/lbmproj	1	myproj	4 days ago
